

I am totally against NAB's petition 04-160 and the proposed HR 4026 because as a subscriber to satellite radio, I feel I am entitled to all of the services and station that is offered by my carrier. I don't think that the NAB has any fight here, because if the member station of NAB would offer similar programing and services, Satellite radio would not be such a value. NAB member stations do not meet my needs as a consumer all of the time, and I should have the choice that Satellite radio gives me and that I choose to pay for. NAB member stations or networks should be forced to compete as do the Satellite radio providers. I should be able to choose which service I want after the product is offered. Don't legislate change just because one side is now losing their position.
